

JEAN DE DIEU MANISHIMWE

Manager, Data Systems & IT | Infrastructure, Cybersecurity, Cloud, DR/BCP & Data Systems

Kigali, Rwanda | +250 788 350 654 | aimejayd2016@gmail.com | linkedin.com/in/jean-de-dieu-manishimwe-10a11761

Profile

IT, infrastructure and data systems leader with 7+ years across banking, international development and digital health. Manages mission-critical infrastructure, cybersecurity, cloud and server environments, backup and disaster recovery, IT governance and technology vendors across multi-country operations. Builds ETL integrations, dashboards and automation in Python and PowerShell, and has integrated health data systems (FHIR, DHIS2) for pan-African programmes. Nominated Risk Champion for IT at NCBA Bank Rwanda; ISO/IEC 27001 Lead Implementer and ISO/IEC 20000 Lead Auditor. Experienced in leading technical teams in remote, multi-country settings.

Technical Skills

Infrastructure	Windows & Linux servers, Active Directory, VMware, Hyper-V, SAN/storage, LAN/WAN, Cisco CCNA
Cloud & DevOps	AWS, Microsoft Azure, hybrid cloud operations, Terraform (IaC), Docker
Cybersecurity & Risk	ISO 27001 controls, access management (RBAC, privileged access), patching, server hardening, IT risk assessment
DR & Business Continuity	DR planning and testing, backup and recovery, replication, Business Impact Analysis, RTO/RPO
Databases	Database administration and design: Oracle, SQL Server, MySQL, PostgreSQL; SQL; data integrity
Data Integration	ETL pipelines, API integration, FHIR and DHIS2 health-data interoperability, data quality
Dashboards & Analysis	Power BI, Tableau, Excel; KPI, operational and monitoring dashboards
Automation & Scripting	Python (scripting and data analysis), PowerShell, Bash, Ansible
Governance & Service	ISO/IEC 20000, ITIL incident, problem and change management; SLA and vendor management
Leadership & Training	Team leadership, multi-country coordination, budget planning, user training and manuals

Professional Experience

Manager, IT Infrastructure & Security

NCBA Bank Rwanda PLC • Full-time • Jun 2026 – Present

Lead IT infrastructure, security and technology operations supporting mission-critical banking services across 9+ branches; collaborate with NCBA Group subsidiaries on shared IT standards. Nominated Risk Champion for the IT function.

- Lead enterprise IT infrastructure operations covering servers, virtualization, storage, networks, cloud services, security technologies and critical production systems.
- Manage 100+ servers across Windows and Linux environments, Active Directory, virtualization platforms, enterprise storage and backup technologies.
- Lead infrastructure disaster recovery and business continuity initiatives, including VMware replication, Veeam backup and recovery, DR failover testing and recovery validation; met RTO/RPO targets in each recovery test.
- Implement and maintain cybersecurity and access controls including MFA, privileged access management, endpoint security, server hardening and patch management.
- Coordinate infrastructure monitoring, incident response, problem management and service restoration for critical banking systems.
- Manage 10+ technology vendors and Level 2/3 support partners, ensuring SLA adherence, issue resolution and operational performance.
- Lead IT risk, control and compliance activities and support internal and external technology audits.
- Led NCBA Rwanda's ISO/IEC 20000 certification as part of the NCBA Group ITSM programme, implementing service-management processes, controls, governance and documentation.
- Define and monitor IT service KPIs, availability, performance and operational dashboards to drive continuous improvement.
- Participate in technology change governance, ensuring testing, implementation readiness, rollback planning and stakeholder communication.
- Lead and coordinate cross-functional technology initiatives involving infrastructure, security, applications, databases and business stakeholders.

Assistant Manager, IT Infrastructure & Security

NCBA Bank Rwanda PLC • Full-time • Aug 2024 – Jun 2026

Managed enterprise IT infrastructure, security and operations for mission-critical banking systems; promoted to Manager in June 2026.

- Managed enterprise infrastructure (servers, networks, virtualisation, storage) supporting high-availability banking systems.
- Coordinated incident, problem and change management; supported ISO 27001 and banking regulatory compliance.
- Administered AWS and Azure environments, applying Infrastructure as Code and scripted automation.

Consultant

Oak Industries Ltd • Remote • Jan 2026 – Sep 2026

Remote consultant delivering data, automation and AI-enabled solutions for private-sector organisations in Rwanda.

- Built more than 3 dashboards in Power BI and a social-monitoring and market-intelligence backend that brings multiple data sources into one automated pipeline.
- Built a multilingual (Kinyarwanda, French, English) classification system for customer feedback, with a Python backend, API integrations and cloud deployment.
- Led client engagements end to end: scoping requirements, advising on measurable business value, and delivering working prototypes on cloud platforms.

Technical Lead

Africa Digital Health Networks (ADHN) • Remote, part-time • Sep 2023 – Sep 2025

Led development of the digital collaboration platform for the Africa Digital Health Networks (ADHN), a continent-wide network launched at the Africa HealthTech Summit in Kigali in 2023.

- Built ETL and data integration pipelines that move health data between systems through FHIR and DHIS2 interoperability and API integrations.
- Built on Azure and AWS using Python/Django, Node.js and React; oversaw system performance, security and continuous improvement.
- Led multi-country coordination of engineers, data experts and health-policy stakeholders.

Senior IT Engineer / System Administrator

Cogebanque PLC → Equity Bank Rwanda (merger) • Full-time • Jan 2023 – Aug 2024

Administered core banking infrastructure through a major merger, maintaining 24x7 operations with no customer-facing downtime.

- Administered servers, storage, virtualisation, networks and databases supporting core banking applications.
- Implemented backup, replication, disaster recovery testing and security hardening to protect critical financial data.
- Led infrastructure integration across 50+ branches and systems during the Cogebanque–Equity Bank merger; coordinated vendors and supported compliance audits.
- Managed Linux and Windows servers, Active Directory and database backups, with access control and patching across the estate.
- Automated routine administration and monitoring with Bash and Python scripting, including alerting and system health checks.

Senior IT Specialist

RTI International (USAID-funded programme) • Full-time • Jan 2020 – May 2022 • Multi-country

ICT infrastructure and programme support for a USAID-funded development project across 6 countries.

- Delivered ICT infrastructure, support and security across the programme's sites and countries.
- Introduced structured IT service processes, asset management, user training and manuals; managed vendors and ensured donor compliance.
- Provided second-level IT support and incident management; delivered IT training and cybersecurity awareness.
- Coordinated contracted services and support desks to resolve requests efficiently.

Education

MBA in Artificial Intelligence • Nexford University • In progress, expected 2027

BSc Computer Science • African Leadership University

Certifications

Security & Governance	ISO/IEC 27001 Lead Implementer • ISO/IEC 20000 Lead Auditor • Google IT Support & Cybersecurity
Cloud & Networking	AWS Certified Cloud Practitioner • Microsoft Azure Fundamentals • Cisco CCNA • Microsoft 365 Administration
In progress	PMP • CISSP

Languages

English (fluent) • French (working) • Kinyarwanda (native)
